

# MP24TP Series **Mini5**™

## Mini5™ Cat5e Through Coupler Panels

The NEW Mini5™ 24 port through coupler panel features a built in recessed label strip with a protective clear plastic cover and a clip on cable management strain relief bar.

Designed for use as cross connect panels they can be used for voice and data applications

The couplers exceed the requirements of the TIA/EIA 568B Category 5e specification and can be used for all network protocols covered within the Category 5e standards. Each panel is supplied pre-assembled with the Category 5e RJ45 couplers mounted in a flush fit plastic front skin which is then fitted into a metal panel for extra rigidity.

Cage nuts and tie wraps are also supplied with each panel.

Available in 24 port UTP configuration

### NEW Mini5™ 24 Port UTP Cat5e Through Coupler Panel

The UTP panel use the high performance Mini5™ Category 5e RJ45 UTP coupler to ensure low levels of NEXT and minimise Return Loss effects in use.

Features include:

24 Port UTP Cat5e Couplers

Metal panel with plastic inserts

Recessed designation strip

Cable Management bar

Cage nuts included
