

MT66-CP2490 **Mini6**™

Mini6™ Category 6 90° Patch panels

The Mini6™ Category 6 punch down panel incorporates a rear cable management Tray and horizontal DUAL IDC punch-down blocks.

To protect the ports from the ingress of dust onto the contacts, a hinged protective cover is fitted to each port. Additional features include dual integrated label strips with protective covers.

The lower strip is numbered 1-24, leaving the upper strip to be used for additional port information.

This sturdy 19" rack mount panel is made from 1.2mm thick steel for strength and to ensure rigidity when rack mounted.
