

Mini5TM

MT-F19000
Pocket Fault Finder

Laser fault Finder

The New Mini5TM Pocket Fault Locator has been designed to offer maximum performance at a cost effective price.

The Pocket Fault Locator is a rugged and lightweight, just 18cm in length and only 130g in weight.

The universal adapter accepts any 2.5mm ferruled connector including ST, SC, & FC.

By using a high visibility 650nm wavelength coupled with 0dB launch power, this laser can identify micro-bends, fibre breaks and other sources of optical attenuation in fibre patch cables.

This light enables breaks or sharp bends in a cable to be identified 6-7km away on singlemode fibre and 4-5km away on multimode fibre.

Features

- 650nm Class IIIA Laser >5mW Output +/- 5nm
- 0dB fibre coupled output
- 2.5 Universal Adapter
- 6-7km Singlemode
- 4-5km Multimode
- Extra-Long Battery Life with Two "AA" Batteries
- Battery Life 30Hrs continuous
40Hrs modulated
- Continuous and Modulated Modes
- Carry case
